Precious metals
for medical-scientific solutions

8853

Au	Ag
Pt	Pd

The partnership between **8853 S.p.A.**, leading company in the precious metal sector, and medical professionals gives life to **88Medical**: precious metals for medical-scientific solutions.

8853 S.p.A.'s know-how and the continuous research for technologies of the latest generation enable **88Medical** to satisfy any request by its clients, fulfilling their needs with practical solutions. Skills of industrial dimension and customization are combined in synergy to offer medical devices and lab tools for the medical-scientific sector.

88Medical's production ranges from **threads, tubes, plates, disks, rings** and **probes for lab tools** made with **Platinum, Palladium, Gold, Silver** and their alloys, to **medical device** components such as **stents, fiducials markers and electrodes** manufactured for its clients.

88Medical's medical labs have enabled the firm to become a brand specialized in the **casting of a wide range of alloys, laser marking and welding, plating and finishing**.

"Made to measure" solutions fully complying with the Made in Italy standards represent the point of strength of **88Medical** which, thanks to the support of professional engineers, is able to follow the client through every production stage: from design to realization.

8853 S.p.A.'s **Quality Assurance System** complies with the **EN ISO 13485:2003/AC:2009** rules and with the specific requirements set forth for planning, development, production and sale of medical devices.

The CE marking of **88Medical** products is certified by the **TÜV** Product Service GMBH Notified Body of Munich by means of the **EC Certificate, N° G1 08 02 40503 007**.

8853 S.p.A. is a member of the **RJC** (Responsible Jewellery Council) which guarantees the use of "conflict free" metals.
